ELEA

Follow your heart.

ELEA is an original and sustainable range made from precious, elegant wood. This flexible range provides stunningly different and individual combination using amazingly few components. A puristic approach combined with clean

lines and uncluttered simplicity delivers a striking, timeless design. Giving a contemporary edge to classic living, it adds an excitingly unusual visual impact.

Version: solid natural oak Coffee table: CT 120

- 1 ELEA features a clear, compact, geometrical design, which is emphasised by relief-planned surfaces. The meticulous cross-shaped joint reflects outstanding craftsmanship.
- 2 The perfectly crafted ELEA designs strikingly highlight the beauty of the wood. Carefully integrated handles make unsightly protrusions unnecessary.

Living rooms.

Structured beech, the beautiful wood used for ELEA, is precious, durable and full of character. During the manufacturing process, we preserve the vital elasticity of the wood, a sign

of its genuineness. In our 5-layer-board, the natural properties of the wood reduce any unwelcome warping of the material whilst maintaining its solid look.

Look out for beech. Not just in a thunderstorm.

Legend has it that a beech tree provides protection in a thunderstorm. As to whether this tree magically does keep lightning away is uncertain. Structured beech, however, will

certainly bring an interesting and comfortable atmosphere to your living room whilst ELEA's strikingly simple design and relief planed surfaces enhance its natural beauty.

- 1 The 55 cm deep, 2 Raster lower section with upright rear panel and a flap provides ample space for a screen. Available in 55 cm, 110 cm and 165 cm widths, it can easily accommodate even larger TVs.
- 2 The 2 Raster suspended unit with flap is a real eye-catcher; even more so if you choose the lit version of the bronze glass compartment, which can be optionally on the left – as shown here – or on the right of the unit.
- 3 These wall-mounted shelves are available in 55 cm, 110 cm and 165 cm widths and – due to our special invisible brackets – seem to defy gravity.

Pure enjoyment stimulates your mind and tantalises your senses.

A good conversation with friends, a nice bottle of wine, a delicious meal at a beautifully laid table – if you enjoy all of these, then you will want to do it in style. The ELEA sideboard and lit angular shelf will be the perfect choice.

Version: solid natural oak Dining table: ET 1400 Chairs: D 20

- 1 The 6 Raster ELEA highboard provides perfect solutions for storing all the useful bits and pieces in your dining room, which you would like to have to hand but not necessarily want to see. The stately 204.0 cm width, considerable 119.1 cm height and comfortable 45.8 cm depth provides you with ample storage space.
- 2 The middle section is available in two versions: either with two drawers at the bottom and 1 wooden/glass door with bronzed glass shelf at the top – this lit glass compartment is a real eye catcher – or with 6 recessed drawers that perfectly highlight the beautiful wood.
- 3 Both highboard versions feature a large wooden door on the left and right that are visually – but not functionally – divided in the centre. Behind each of these doors, 2 wooden fitted shelves provide plenty of storage on 3 generous levels.

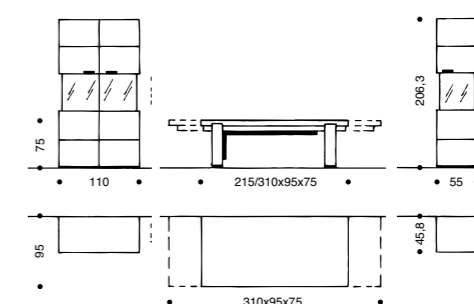

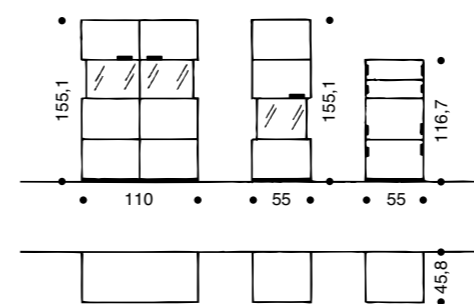

Individual dimensions of living.

From a physical point of view, each room has three dimensions. ELEA reveals another one – your individual one. It will have a lasting effect on your view of the living environment

and the way it is furnished. ELEA offers a wide choice of units in different heights, widths and front versions as well as bespoke productions to suit your requirements.

- 1 The 8 Raster high glass cabinets are optionally available with a glass compartment above – as shown here – or below the centre line.
- 2 A lower glass section provides a perfect view of the display when seated.
- 3 The 6 Raster single unit with 4 drawers provides ample storage on little floor space.

- 4 The most precious treasures can be lit to great effect behind bronze glass. The others will have to wait for their grand entrance behind wooden doors.
- 5 A stunning statement even on little floor space: the 11 Raster high ELEA glass cabinet is available with one door in 55 cm width or with two continuous doors in 110 cm width.

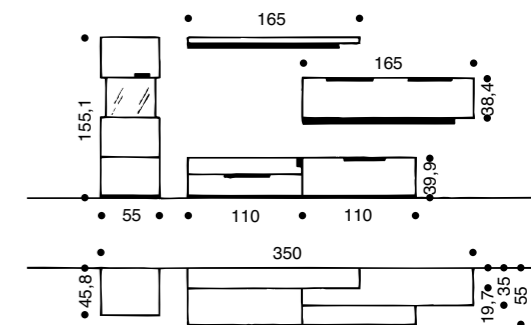

If you want to leave your mark, try something new.

Do you still remember the typical living room combinations of the 20th century? They used to be overpowering, dark and obtrusive. We at hülsta have come up with entirely

different ideas. The result: a light, simple, modern range. A puristic approach that will inspire you to choose your individual design. Stylish, natural comfort. ELEA.

1 Modern TV screens are getting larger and larger. This 2 Raster high lower unit with its upstand offers a clean finish on the wall and provides storage for more equipment behind the large flap. The centre panel in the compartment ensures stability across the entire width.

ELEA compact

hülsta 

Structured. Using a special plane on the wood in the direction of the grain produces a distinctive relief that highlights the grain and is beautiful to both the touch and the eye.

Transparent. Coffee table or display cabinet? The CT 120 is both. The drawer underneath the angled glass top provides space for beautiful objects and displays them to great effect.

Handy. In order not to interrupt the effect of the beautiful wooden fronts, ELEA has no surface-mounted handles. Instead, the upper and lower edges of the fronts feature elaborately integrated handles, which are also a great haptic experience.

Reasonable. Light effects are not only attractive but also contribute to creating a comfortable atmosphere. ELEA uses LED lights that have an extremely long lifetime, use little electricity and are therefore a beautiful and energysaving solution.
